# Government Engineering College Sec-28 Gandhinagar

## Certificate

This is to certify that

Mr./Ms. Ajay Kalubhai Prajapati Of class CE SEM 6

Division B2 Enrollment No. 190130107112 has Satisfactorily  
completed his/her term work in Web Programming Subject  
for the term ending in April 2021-2022

Date: -

Signature:-

## **Vision and Mission of Computer Department:**

### **Vision:**

- ✓ To achieve excellence for providing value-based education in Computer Engineering through innovation, team work and ethical practices

### **Mission:**

- ✓ To produce computer science and engineering graduates according to the needs of industry, government, society and scientific community.
- ✓ To develop partnership with industries, government agencies and R and D Organizations
- ✓ To motivate students/graduates to be entrepreneurs.
- ✓ To motivate students to participate in reputed conferences, workshops, symposiums, seminars and related technical activities

## Index

| S.No | Name of The Program   | Grade | Date | Signature |
|------|---|-------|------|-----------|
| 1    | Create your resume and class timetable using HTML Tags – also experiment with colors, text, link, size and other tags. (Do not use any Framework)   |       |      |           |
| 2    | Use inline and external CSS to format your resume and class timetable from practical  |       |      |           |
| 3    | Create a simple online calculator with number (0 to 9) buttons, mathematical symbols (*, +, =, *, ^, /). Each button pressed should be displayed on equation text space and show the result when '=' is clicked. Use proper formatting and images as per requirement. Always display current date on top. |       |      |           |
| 4    | Add various animation on calculator with CSS  |       |      |           |
| 5    | Create a website registration page, use client-side validation all the fields. On successful data submission display a popup with success and redirect to your resume page. Use external js for validation.   |       |      |           |

|    |   |  |  |  |
|----|---|--|--|--|
| 6  | Write a php program to display your resume, class timetable and online calculator on three different pages.<br>Display same menu header on all pages. |  |  |  |
| 7  | Write a php program for website registration, save data on database and display prefilled profile of the user after successful submission.            |  |  |  |
| 8  | Write a php program to authenticate the user. Only authenticated users should be able to view resume, timetable, calculator and profile.              |  |  |  |
| 9  | Write a blog application with different users -Writer will have ability to write a blog,normal users can only comment on blog.                        |  |  |  |
| 10 | Write an admin page for your website where admin can view all the users and blogs from db,manually users and remove some users.                       |  |  |  |

## Practical 1

Aim:- Create your resume and class timetable using HTML Tags – also experiment with colors, text, link, size and other tags. (Do not use any Framework)

## Practical 3

Aim:Create a simple online calculator with number (0 to 9) buttons, mathematical symbols (\*, +, =, \*, ^, /). Each button pressed should be displayed on equation text space and show the result when '=' is clicked. Use proper formatting and images as per requirement. Always display current date on top.

Code[.HTML]:

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta http-equiv="X-UA-Compatible" content="IE=edge">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>CALC</title>

    <script>
        function dis(val){
            document.getElementById("result").value+=val
        }
        function solve(){
            let x=document.getElementById("result").value
            let y=eval(x)
            document.getElementById("result").value=y
        }
        function clr(){
            document.getElementById("result").value=""
        }

    </script>

</head>
<body>
    <p id="demo"></p>

    <script>
        const q = new Date();
        document.getElementById("demo").innerHTML = q;
    </script>
```

```
<div class="title">CALCULATOR</div>
<table class="table" border="2px">
    <tr>
        <td colspan="3"><input type="text" style="background-color: white; color: black;" id="result"/></td>
        <td><input type="button" style="background-color: red;" value="c" onclick="clr()"></td>
    </tr>
    <tr>
        <td><input type="button" value="1" onclick="dis('1')"/></td>
        <td><input type="button" value="2" onclick="dis('2')"/></td>
        <td><input type="button" value="3" onclick="dis('3')"/></td>
        <td><input type="button" value="/" onclick="dis('/')"/></td>
    </tr>
    <tr>
        <td><input type="button" value="4" onclick="dis('4')"/></td>
        <td><input type="button" value="5" onclick="dis('5')"/></td>
        <td><input type="button" value="6" onclick="dis('6')"/></td>
        <td><input type="button" value="-" onclick="dis('-')"/></td>
    </tr>
    <tr>
        <td><input type="button" value="7" onclick="dis('7')"/></td>
        <td><input type="button" value="8" onclick="dis('8')"/></td>
        <td><input type="button" value="9" onclick="dis('9')"/></td>
        <td><input type="button" value="+" onclick="dis('+')"/></td>
    </tr>
    <tr>
        <td><input type="button" value=". " onclick="dis('.')"/></td>
        <td><input type="button" value="0" onclick="dis('0')"/></td>
        <td><input type="button" style="background-color: blue;" value="=" onclick="solve()"/></td>
        <td><input type="button" value="*" onclick="dis('*')"/></td>
    </tr>
</table>
</body>
</html>
```

## Output:

Sun Apr 17 2022 18:59:12 GMT+0530 (India Standard Time)

CALCULATOR

|  |   |   |   |  |  |  |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |

## Practical 4

Aim: Add various animation on calculator with CSS

### HTML Code[.html]

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta http-equiv="X-UA-Compatible" content="IE=edge">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>CALC</title>
<link rel="stylesheet" href="p3.css">
<script>
    function dis(val){
        document.getElementById("result").value+=val
    }
    function solve(){
        let x=document.getElementById("result").value
        let y=eval(x)
        document.getElementById("result").value=y
    }
    function clr(){
        document.getElementById("result").value=""
    }

</script>

</head>
<body>
    <p id="demo"></p>

    <script>
        const q = new Date();
        document.getElementById("demo").innerHTML = q;
    </script>

    <div class="title">CALCULATOR</div>
    <table class="table" border="2px">
        <tr>
            <td colspan="3"><input type="text" style="background-color: white; color: black;" id="result"/></td>
```

```
<td><input type="button" style="background-color: red;" value="c"
onclick="clr()"></td>
</tr>
<tr>
<td><input type="button" value="1" onclick="dis('1')"/></td>
<td><input type="button" value="2" onclick="dis('2')"/></td>
<td><input type="button" value="3" onclick="dis('3')"/></td>
<td><input type="button" value="/" onclick="dis('/')"/></td>
</tr>
<tr>
<td><input type="button" value="4" onclick="dis('4')"/></td>
<td><input type="button" value="5" onclick="dis('5')"/></td>
<td><input type="button" value="6" onclick="dis('6')"/></td>
<td><input type="button" value="-" onclick="dis('-')"/></td>
</tr>
<tr>
<td><input type="button" value="7" onclick="dis('7')"/></td>
<td><input type="button" value="8" onclick="dis('8')"/></td>
<td><input type="button" value="9" onclick="dis('9')"/></td>
<td><input type="button" value="+" onclick="dis('+')"/></td>
</tr>
<tr>
<td><input type="button" value=". " onclick="dis('. ')"/></td>
<td><input type="button" value="0" onclick="dis('0')"/></td>
<td><input type="button" style="background-color: blue;" value="="
onclick="solve()"/></td>
<td><input type="button" value="*" onclick="dis('*')"/></td>
</tr>
</table>
</body>
</html>
```

## CSS Code[.css]

```
.table{
    border: 2px solid;
    border-collapse: collapse;
    text-align: center;
    width:100;
    box-shadow: 0px 0px 43px 17px rgba(153, 153, 153, 1);
    max-width: 400px;
    margin: 10px;
    background-image: url("p3.jpg");
```

```
}

tr td{
    border: 2px solid;

}

input[type="button"]{
    width: 100%;

}

input[type="text"]{
    color: black;
}

tr td :hover{
    background-color: green;
    color: blanchedalmond;
    transition: 0.5s ease-in-out;
}

tr td c{
    background-color: red;
    color: red;
}

.title{
    font-family: 'Times New Roman', Times, serif;
    font-size: larger;
}
```

## Output:

Sun Apr 17 2022 19:01:46 GMT+0530 (India Standard Time)

### CALCULATOR

|   |   |   |   |
|---|---|---|---|
|   |   |   | c |
| 1 | 2 | 3 | / |
| 4 | 5 | 6 | - |
| 7 | 8 | 9 | + |
| . | 0 | = | * |

## Practical 5

Aim:Create a website registration page, use client-side validation all the fields. On successful data submission display a popup with success and redirect to your resume page. Use external js for validation.

HTML Code[.html with css]

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta http-equiv="X-UA-Compatible" content="IE=edge">

<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>Document</title>
<style>
.a
{
background-color: aqua;
margin-left: 45%;
margin-top: 200px;
padding-left: 40px;
width: 10%;
font-family: 'Franklin Gothic Medium', 'Arial Narrow', Arial, sans-serif;
border: 2px solid black;
box-shadow: 0px 0px 43px 17px rgba(153, 153, 153, 1);
border-radius: 15%;

}
.f
{
width: 80%;

}
.s
{
border: 1px solid black;
margin-left: 45px;
border-radius: 15%;
transition: 0.5s ease-in-out;
```

```
}

.s:hover
{
    background-color: black;
    color: aqua;
}

</style>

</head>
<body>
<div class="a">
<h1>Login Form</h1>
<form class="f" name="myform" onsubmit="return validate(this)" method="get"
action="p1.html">
    Username:<input type="text" name="Username" size="10"><br><br>
    Password:<input type="text" name="Password" size="12"><br><br>
    <input type="submit" class="s" value="Register" onclick="myfunction()"><br><br>
</form>
</div>
<script type="text/javascript" src="validate.js"></script>
</body>
</html>
```

## JS Validation[.js File]

```
function validate(form) {
    var un = form.Username.value;
    var pw = form.Password.value;
    var Firstcharstr1 = /^[A-Za-z]/;
    var Firstcharstr2 = /^[A-Za-z]/;
    var Firstcharstr3 = /^[0-9]/;

    if (un.length === 0) {
        alert("You must enter a Username");
        return false;
    }
    if (pw.length === 0) {
        alert("You must enter a Password");
        return false;
    }
    if (pw.length < 6 || pw.length > 12) {
        alert("You must enter Password between 6 to 12 characters");
        return false;
    }
}
```

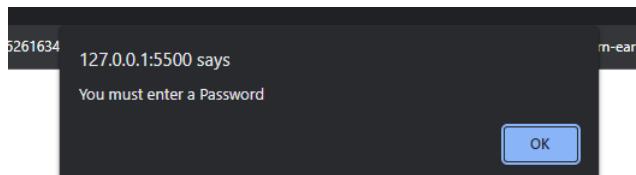

```
}
```

```
if ((Firstcharstr1.test(un))) {
    alert("You must enter valid Username");
    return false;
}
if ((Firstcharstr2.test(un))) {
    alert("You must enter valid Username");
    return false;
}
if ((Firstcharstr3.test(un))) {
    alert("You must enter valid Username");
    return false;
}
else{
    alert("Successfully Register");
    return true;
}
}
```

## Output:

## Validation:

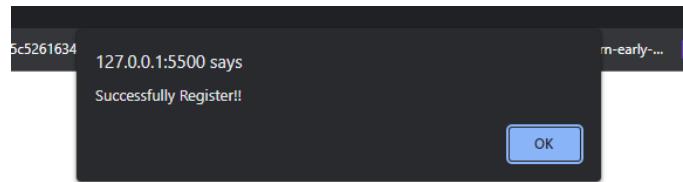

**Login Form**

Username:

Password:

## Success:

### Login Form

Username: Ajay

Password: Prajapati

## Resume Page:

Ajay Prajapati  
Phone No: 7990078233  
Email : ajay.prajapati2911@gmail.com

**Personal Data**

- Date of Birth : 29/11/2001
- Age : 20
- Place of Birth : Kadi-Mahesana
- Father Name : Kalubhai Dashrathbhai Prajapati
- Mother Name : Manjulaben Kalubhai Prajapati
- Address : 70,Siddhraj Society Karannagar Road Kadi
- Religion : Hindu
- Sex : Male
- Civil Status : Single
- Language : Gujarati,Hindi,English

**Educational Background**

| No | Education | Year | Percentage |
|----|-----------|------|------------|
| 1  | SSC       | 2017 | 75%        |
| 2  | HSC       | 2019 | 85%        |

**Hobby**

- Gaming
- Cricket
- Table Tennis

**Skill**

- Web Programming(HTML/CSS/Java Script)
- Python

**My strength**

- Strong Negotiation Skills
- Self-motivated & Strong Goal Oriented Focus
- Active team member

**Declaration**

I hereby declare that the above mention information is true to the best of my knowledge.

## Practical 6

Aim: Write a php program to display your resume, class timetable and online calculator on three different pages. Display same menu header on all pages.

Code:

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta http-equiv="X-UA-Compatible" content="IE=edge">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>Document</title>
<style>
.btn{
    border: 1px solid black;
    height: 20;
    margin-left: 50px;
    padding: 5px;
    padding: 2px 2px;
    width: 10%;
    font-size: 25px;
    border-radius: 10px;
    background-color: chartreuse;
}
.btn :hover{
    background-color: greenyellow;
    color: black;
}
.div{
    padding: 20px;
    background-color: blue;
    text-align: center;
}

</style>
<script type="text/javascript">
```

```
function newSrc()
{
    document.getElementById('if').src="resume.html";
}
function newSrc1()
{
    document.getElementById('if').src="tt.html";
}
function newSrc2()
{
    document.getElementById('if').src="calc.html";
}
</script>
</head>
<body>
<div class="div">
    <button class="btn" onclick="newSrc();">Resume</button>
    <button class="btn" onclick="newSrc1();">Time Table</button>
    <button class="btn" onclick="newSrc2();">Calc</button>
</div>
<iframe width="100%" height="1500" id="if"></iframe>

</body>
</html>
```

## Output:

| Time           | Monday                                 | Thursday                 | Wednesday                    | Thursday                                | Friday   | Saturday                  |

## Practical 7

Aim: Write a php program for website registration, save data on database and display prefilled profile of the user after successful submission.

### HTML Code[.html]

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta http-equiv="X-UA-Compatible" content="IE=edge">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>Registration</title>
<style>
.div{
    border: 2px black;
    font-family: Cambria, Cochin, Georgia, Times, 'Times New Roman', serif;
    margin-left: 40%;
    margin-top: 20%;
    border: 2px solid black;
    width: 15%;
    text-align: center;
    padding-bottom: 40px;
    background-color:cadetblue;
}
.btn{
    border: 1px solid black;
}
.btn:hover{
    background-color: black;
    color: white;
    transition: 0.5s cubic-bezier(0.445, 0.05, 0.55, 0.95);
}

</style>

</head>
<body>
```

```
<div class="div">
    <h2 class="h2">Registration Form</h2>
    <form class="f" onsubmit="return validate(this)" method="get"
action="http://localhost/WP/demo.php">
        Username:<input type="text" name="Username" size="10">
        <button class="btn" type="submit">Submit</button>
    </form>
</div>
<script type="text/javascript">
function validate(form) {
    var Username = form.Username.value;
    var Firstcharstr1 = /^[A-Za-z]/;
    var Firstcharstr2 = /^[A-Za-z]/;
    var Firstcharstr3 = /^[0-9]/;

    if (Username.length === 0) {
        alert("You must enter a Username");
        return false;
    }

    if ((Firstcharstr1.test(Username))){
        alert("You must enter valid Username");
        return false;
    }
    if ((Firstcharstr2.test(Username))) {
        alert("You must enter valid Username");
        return false;
    }
    if ((Firstcharstr3.test(Username))) {
        alert("You must enter valid Username");
        return false;
    }
    else{
        alert("Successfully Register");
        return true;
    }
}

</script>
</body>
</html>
```

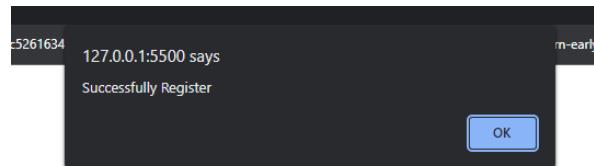

## PHP Code[.php]

```
<?php
$name = $_GET['Username'];
echo "<h3> Hello $name </h3>";
echo "<h3>Successfully Register</h3>";
?>
```

Output:

Registration:

**Registration Form**

Username:

Display Username after Successfully Registration:

**Hello Ajay Prajapati**  
**Successfully Register**

## Practical 8

**Aim:** Write a php program to authenticate the user. Only authenticated users should be able to view resume, timetable, calculator and profile.

**Code:**

**Welcome.php:**

```
<?php
session_start();
if (!isset($_SESSION['username'])) {
header("Location: index3.php");
} ?>
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>Practical 8</title>
<link rel="stylesheet" href="practical8.css">
</head>
<body style="text-align: center;">
<?php
include 'navbar.php';
?>
<h1 style="margin: 20px; color: white;">Practical 8</h1>
<h2 style="margin: 25px; color: white;">RESUME | CALCULATOR |  
TIME-TABLE</h2>
<a style="background-color: #1d3b60; color: white; border-radius: 20px;  
padding: 10px 30px;" href="logout.php">Logout</a>
</body>
</html>
```

**Register.php:**

```
<?php
include 'config.php';
error_reporting(0);
session_start();
if (isset($_SESSION['username'])) { header("Location: index.php");}
} if (
isset($_POST['submit'])) {
$username = $_POST['username'];
$email = $_POST['email'];
```

```
$password = md5($_POST['password']);
$cpassword = md5($_POST['cpassword']);
if ($password == $cpassword) {
    $sql = "SELECT * FROM users WHERE email='$email'";
    $result = mysqli_query($conn, $sql);
    if (!$result->num_rows > 0) {
        $sql = "INSERT INTO users (username, email, password)
VALUES ('$username', '$email', '$password')";
        $result = mysqli_query($conn, $sql);
        if ($result) {
            echo "<script>alert('Wow! User Registration
Completed.')</script>";
            $username = "";
            $email = "";
            $_POST['password'] = "";
            $_POST['cpassword'] = "";
        } else {
            echo "<script>alert('Woops! Something Wrong
Went.')</script>";
        }
    } else {
        echo "<script>alert('Woops! Email Already Exists.')</script>";
    }
} else {
    echo "<script>alert('Password Not Matched.')</script>";
}
?>
<!DOCTYPE html>
<html>
<head>
<meta charset="utf-8">
<meta name="viewport" content="width=device-width,
initial-scale=1.0">

<link rel="stylesheet"
href="https://stackpath.bootstrapcdn.com/font-awesome/4.7.0/css/font-awesome
.min.css">
<link rel="stylesheet" type="text/css" href="practical8.css">
<title>Register Form</title>
</head>
<body>
<div class="container">
<form action="" method="POST" class="login-email">
<p class="login-text" style="font-size: 2rem; font-weight:
800;">Register</p>
<div class="input-group">
```

```
<input type="text" placeholder="Username" name="username" value="<?php
echo $username; ?>" required>
</div>

</div>
<p class="login-register-text">Have an account? <a href="index3.php">Login
Here</a>.</p>
</form>
</div>
</body>
</html>
```

### Logout.php:

```
<?php
session_start();
session_destroy();
header("Location: index3.php");
?>
```

### Index3.php:

```
<?php
include 'config.php';
session_start();
error_reporting(0);
if (isset($_SESSION['username'])) {
header("Location: welcome.php");
} if (
isset($_POST['submit'])) {
$email = $_POST['email'];
$password = md5($_POST['password']);
$sql = "SELECT * FROM users WHERE email='$email' AND
password='$password'";
$result = mysqli_query($conn, $sql);
if ($result->num_rows > 0) {
```

```
$row = mysqli_fetch_assoc($result);
$_SESSION['username'] = $row['username'];
header("Location: welcome.php");
} else {
echo "<script>alert('Woops! Email or Password is Wrong.')</script>";
}
} ?>
<!DOCTYPE html>
<html>
<head>
<meta charset="utf-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">

</div>
<div class="input-group">
<button name="submit" class="btn">Login</button></div>
<p class="login-register-text">Don't have an account?<a href="register.php">Register Here</a>.</p>
</form>
</div>
</body>
</html>
```

## Output:

**Register**

ajay prajapti

ajayprajapati2911@gmail.com

.....

.....

**Register**

Have an account? [Login Here.](#)

localhost says

Wow! User Registration Completed.

OK

Home      Calculator      Resume      Timetable

**Practical 8**

**RESUME | CALCULATOR | TIME-TABLE**

**Logout**

## Practical 9

Aim: Write a blog application with different users -Writer will have ability to write a blog,normal users can only comment on blog.

## Practical 10

Aim:Write an admin page for your website where admin can view all the users and blogs from db,manually users and remove some users.

**addpost .php:**

```
<?php
include('connection.php');
$title = $_POST['title'];
$user_id = $_POST['user_id'];
$content = $_POST['content'];
$query = "INSERT INTO `blog_post`(`title`, `content`, `author_id`)
VALUES ('$title','$content','$user_id')";
$result = mysqli_query($con,
$query);
if ($result) {
echo "New record created successfully";
header("Location: home.php");
}
else
{
echo $con->error;
echo $title . $user_id . $content;
}
$con->close();
?>
```

**New\_post.php:**

```
<?php
// Initialize the session session_start();
// Check if the user is logged in, if not then redirect him to login page
if(!isset($_SESSION["loggedin"]) || $_SESSION["loggedin"] != true)
{ header("location: login.php");
exit;
}
else{
$email = $_SESSION["email"];
$user_id = $_SESSION["user_id"];
```

```
}

?>

## Output:

The screenshot shows a web browser displaying a blog post. The header of the browser says "PHP Blog" and has links for "Home" and "About". On the right side of the header, there are links for "tushar@gmail.com", "new", and "Logout". The main content area has a title "Web 3.0". Below the title is a paragraph of text. At the bottom of the post area, there is a comment section with a "Comments" dropdown and a "Post comment" button.

The screenshot shows a web browser displaying a registration form. The header of the browser says "PHP Blog" and has links for "Home" and "About". On the right side of the header, there are links for "Login" and "Register". The main content area has a form titled "Register". The form contains fields for "First name\*", "Last name\*", "Email\*", "Password\*", and a "Register" button.

### Web 3.0

Web 3.0 is the upcoming third generation of the internet where websites and apps will be able to process information in a smart human-like way through technologies like machine learning (ML), Big Data, decentralized ledger technology (DLT), etc. Web 3.0 was originally called the Semantic Web by World Wide Web inventor Tim Berners-Lee, and was aimed at being a more autonomous, intelligent, and open internet.

The Web 3.0 definition can be expanded as follows: data will be interconnected in a decentralized way, which would be a huge leap forward to our current generation of the internet (Web 2.0), where data is mostly stored in centralized repositories.

Furthermore, users and machines will be able to interact with data. But for this to happen, programs need to understand information both conceptually and contextually. With this in mind, the two cornerstones of Web 3.0 are semantic web and artificial intelligence (AI).
